One Person Unicorn (Agentic)

The Limitations of LLMS

```
X | 2 | O
---+---+---
O | O | 6
---+---+---
X | 8 | X
```

It looks like you're showing me a game of Tic-Tac-Toe with some numbers in the grid.

If you're looking for the best move or trying to understand something specific about this setup, could you give me a bit more detail on what you're aiming for?

You Are X. Is your next best move 2, 6, or 8?

```
X | 2 | O
---+---+---
O | O | 6
---+---+---
X | 8 | X
```

Given this board:

- **Move 2**: Doesn't immediately lead to a win or block a win.

- **Move 6**: Must be taken to block "O" from winning in the next move by completing a column.

- **Move 8**: This isn't a winning move or a necessary block.

The best move is **6**. This blocks "O" from winning by completing the middle column on their next turn. Choosing 6 is a defensive strategy to prevent losing the game.

If you X moved to 2 do you win?

```
X | X | O
---+---+---
O | O | 6
---+---+---
X | 8 | X
```

If "X" is placed at position 2, yes, "X" would win.

Placing "X" at position 2 creates a diagonal win from the bottom right corner to the top left corner (X at positions 8, 5, and 2). My earlier analysis missed this winning move. The correct and winning move for "X" is indeed **2**, not 6 as I previously suggested. Thank you for pointing that out!

Two Essential Elements for Success in the Age of AI

1st Essential Element
for Success

Alignment

Intentional Culture

IT IS NOT ABOUT ROWING KNOWLEDGE

Information Architecture

2nd Essential Element for Success

What is Information Architecture?

- Organizing and structuring information in effective and accessible ways.
- "I Identify the Things and How They Related to Other Things"

What Information Might You Organize?

- Who am I?
- What do I Know?
- What do I Do?
- Who is My Customer?
- What is my Business?
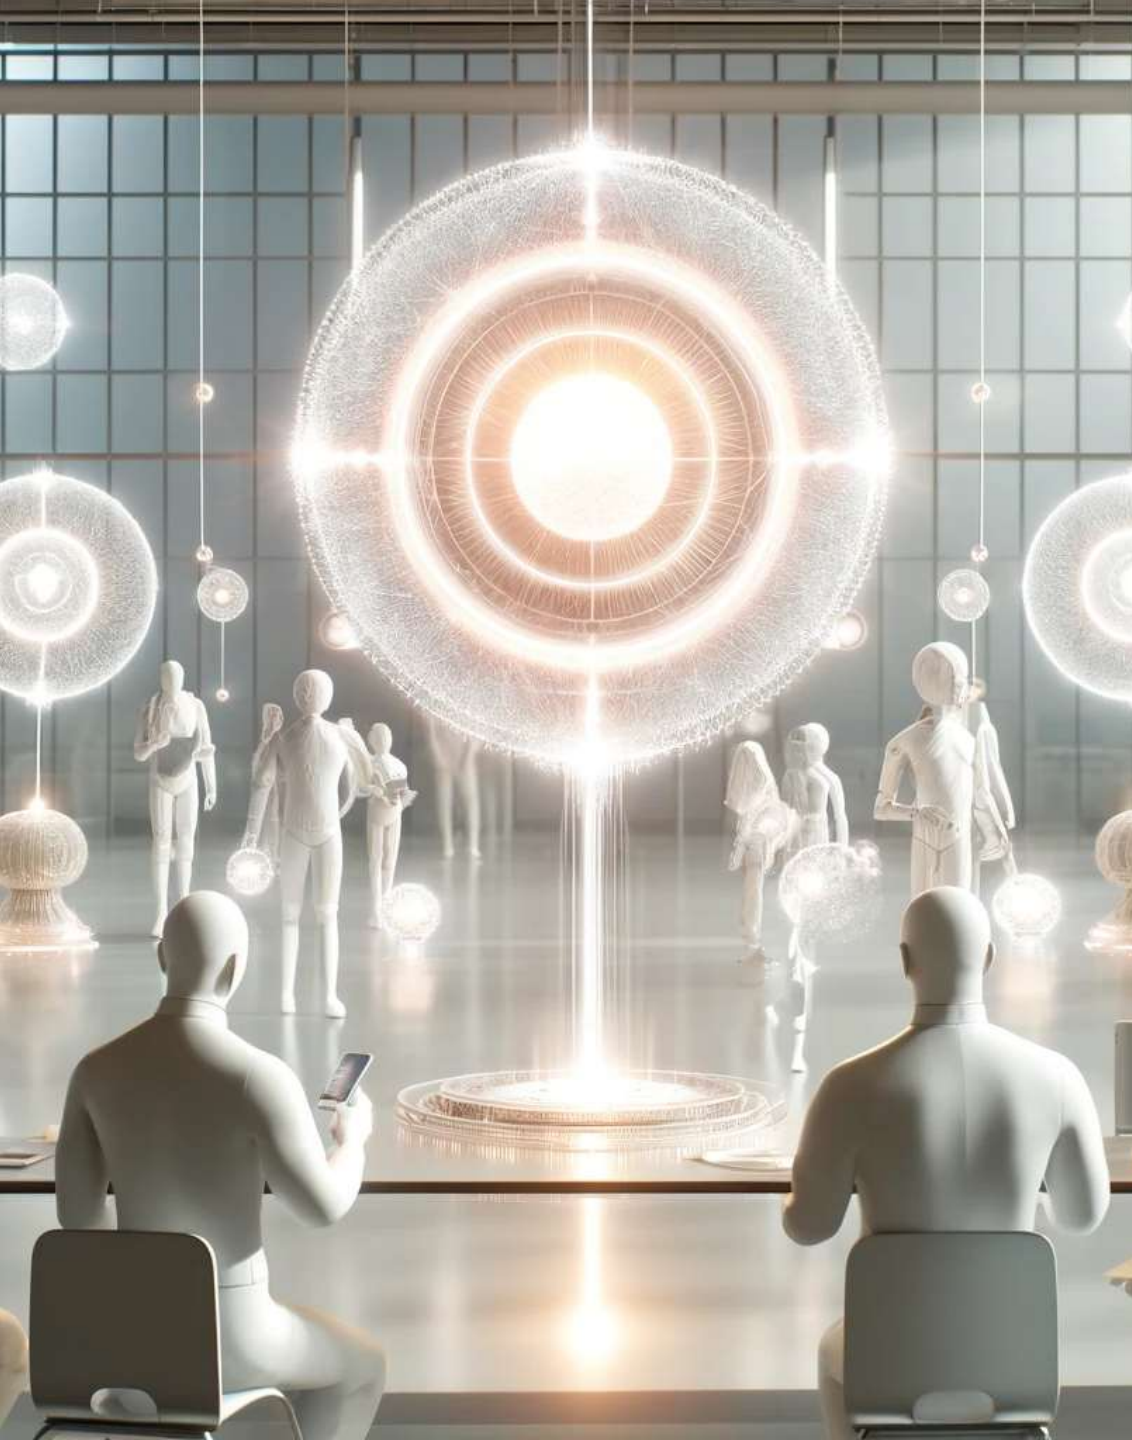

MyGPTs

- Pick a focused topic
- Create a named GPT
- Gather the information
- Ask it questions

Bot #1: Who Am I?

Memoir Architect for Tom Meloche

- Information
  - CV / Resume
  - Bios, Speaker Intros, & Profiles
  - Goals or Vision
  - Cover Letters
  - Social Media Profiles
  - 50 Interesting Facts
  - Videos, Recordings, Images
  - Transcripts of Memories
  - Ceremony Book

Meditations

- Who Am I?
- Create the Content Things (All of the inputs are outputs)
- Is this What Success Looks and Feels Like (my happy)?
- Is This Who I Want to Be?
- Obituary
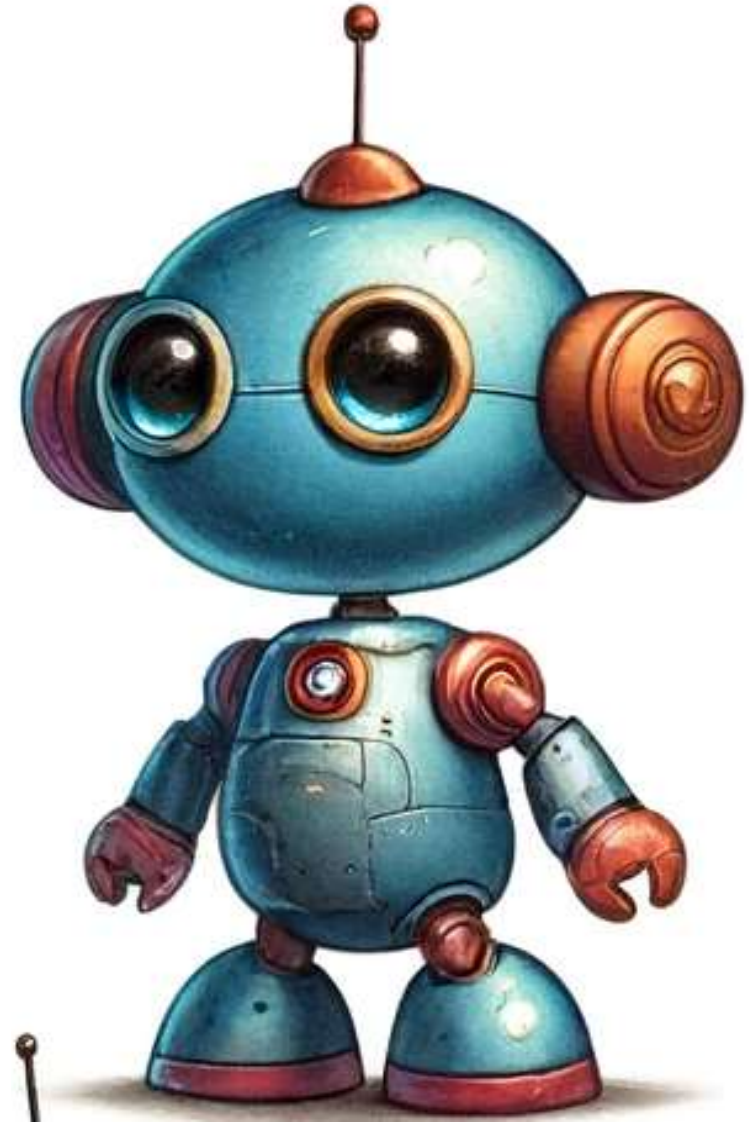

Memoir Architect for Tom Meloche

Thomas Meloche, an innovator and mentor in Agile methodologies and a notable figure in the software development community, passed away leaving a legacy that transformed how organizations embrace change and innovation. Born and raised in Michigan, Tom Meloche graduated from the University of Michigan with a degree in Electrical and Computer Engineering.

He co-founded Menlo Innovations, where he helped forge a workplace culture deeply admired in the tech industry, which was immortalized in the book *Joy Inc.* by Richard Sheridan.

Tom was not only a business leader but also an author and educator. He authored several books, including *Ceremony: A Profound New Method for Achieving Successful and Sustainable Change*, which has influenced countless organizations to adopt Agile practices effectively. His work extended beyond business methodologies; he also co-wrote the best-selling *Ultimate Guide to Facebook Advertising*, reflecting his versatile expertise in both technical and marketing domains...

Bot #3: What is My Business?

- ## Information
  - Mission, Vision, Values
  - Catalogues & Brochures
  - Goals, Projects, OKRs
  - Standards & Style Guides
  - Contracts and Marketing Copy
  - Images, Art, Videos
  - Metrics
  - Roadmaps

A2Agile Inc. Bot

Meditations

- Remember my Mission, Vision, Values

ASSESSMENT HEATMAP

T HEATMAP:

ess Score Results are in a format of a heatmap where each element represents a business capability – that is gth, neutral, or weakness. The idea is to understand the current weaknesses and develop a plan for how to petitiveness in the AI business environment. Organizations with low scores (mainly weaknesses) are unlikely npetitive in the future workplace.

Act on Alignment

AI ASSESSMENT

MATURITY: 39%

We understand the competence needs for implementing and running the various sorts of AI technology.

It is understood that AI Business Technology is based on large amounts of structured and clean data.

We understand the latest trends and opportunities relating to Digital Technology and AI (what does it mean for us?).

It is understood that various business functions use AI in diverse ways (different technologies) to generate business value.

The future govern (roles/mandate, forums, decision, information) needs to support AI business technology are understood.

Our teams and leadership understand the individual, business risks, and financial implications of AI cyber-attacks and/or terrorism.

The importance leadership and culture in optimizing the value of AI Business Technology is acknowledged.

A strategic AI competence plan or how to ensure the right competence, with right drive and at right time (internal or external) is in place.

Both a data strategy and an information architecture (including master data) have been defined to support the AI Business Technology.

We have defined digital technology AI strategy (technical priorities and platforms) aligned with the business value proposition.

An AI operating m on how each business function and unit utilizes AI technology in delivering value to customers has been defined.

The AI and digital governance mode collaboration, responsibility, responsiveness, and anticipatory vision are defined.

A clear set of rules principles on how to protect the organization from AI cyber-attacks and terrorism is Defined.

Principles for a data-driven culture and mind-set to support our AI Business Transformation as well as to reduce resistance to the change are defined.

We continuously execute, update, and reflect on our AI competence strategy – ensuring it is contributing to an optimal business value.

Our teams and leadership continuously evaluate the validity and quality of the data to ensure accurate AI Business Technology outcomes.

Evaluating and adjusting our AI Business Technology to ensure it delivers accurate outcomes and business value happens continuously.

Evaluating the eth and moral aspects of AI Business Technology is ongoing – especially how it contributes to a better society and business landscape.

Our teams and leadership guide the implementation and administration of the AI and digital governance model.

We continuously out cyber security drills" (and training) to keep the organization focused and able to respond quickly to incidents.

Behavioural and cultural change management is used to adjust the organization to new AI and data-driven mind-set and decision-making.

We have the right tools and competences to build the right capability base (for example: AI Centre of Excellence).

The right frameworks, tools, and competences for AI innovation and change management are in place.

Best practice frameworks, tools, competences to optimize business impact and the maturity of the digital transformation and technology are being used.

We continuously improve and adapt our AI frameworks, tools, and competences to optimize the value delivery of the AI Operating model.

The frameworks, too and competences needed to govern AI (for example: portfolio mgmt. etc.) are constantly updated.

Innovative AI frameworks, tools, and competences to protect the organization's AI from cyber-attacks and terrorism are in use.

We have the right coaches and mentors to help us shape our leadership behavior and transformational responsibilities.
